Mr. Christopher Juan Costain, a UK national, joined the World Bank in 1996 and recently relocated to Jakarta to take up the position as Financial Sector Coordinator for the Indonesia programme.. Juan’s immediate prior experience has been in Africa, where he was coordinating the Ebola response of the World Bank’s Finance and Markets practice, and in South Asia where he was Regional Team Leader for the Water and Sanitation Programme a multi-donor partnership administered by the World Bank to support poor people in obtaining affordable, safe and sustainable access to water and sanitation services. Juan has also held various positions at the World Bank in country programme management and private and financial sector operations covering competitiveness, public private partnership (particularly infrastructure finance facilities), public sector reform, and financial sector development mostly in Africa and in South Asia, but including activities across all the Bank’s regions. Juan’s experience outside the World Bank has been in investment banking and hedge fund investment, in London and Hong Kong. Juan holds an M.Sc.(Econ) and B.Sc. (Econ) in monetary economics from the London School of Economics and the Chartered Financial Analyst (CFA) designation.

Mr. Gailius J. Draugelis is the World Bank’s Indonesia Energy Sector Coordinator responsible for strategy and oversight of a lending portfolio of about \$2.5 billion, technical assistance and policy advisory services. Prior to this position he was Program Leader, Energy, Climate Change, Environment and Agriculture for the World Bank’s China and Mongolia portfolio. In his 20-year career at the World Bank, Mr. Draugelis has had the privilege of advising clients and managing investment and policy lending projects covering energy efficiency, clean energy and urban infrastructure across China, Mongolia, the Baltic states, Southeast Europe, Central Asia and now Indonesia. Gailius is one of the main authors of a joint World Bank-Development Research Center of China’s State Council flagship study on “Urban China: Toward Efficient, Inclusive and Sustainable Development” and responsible for the study’s chapter on green urbanization, covering environmental governance, air quality, urban planning, transportation, industrial energy efficiency, building energy efficiency, clean energy supply, district energy, water, and solid waste.
